Content Program

Energy is grabbing the headlines daily. When it comes to fighting climate change or from the viewpoint of foreign dependency, energy plays a pivotal role. The offshore energy sector is in the middle of all these developments. The content program of Offshore Energy Exhibition & Conference 2022 (OEEC) gives an overview on what is going on and singles out important drivers of change. This year hydrogen, floating wind and CCS will be in the spotlight. Offshore renewables like wind, wave and solar take the stage, together with the maritime industry and fossil energy.

CONFERENCE SESSIONS

In an inspiring setting, thought leaders and industry experts come together to share knowledge and discuss the latest trends. From specific presentations on game changing developments to translating global trends to the offshore sector, the OEEC conference program gives you the opportunity to increase your industry knowledge.

The Roadmap to Hydrogen Tuesday 29 November | 10:00 – 11:00

When it comes to hydrogen, the ambitions are sky high. But how does the society transform into a hydrogen economy? Panel discussion and presentations are going to tell the story on how hydrogen is going to be integrated in our lives.

Opportunities in Offshore Wind Wednesday 30 November | 10:00 – 11:15

Governments around the globe commit to offshore wind. This is generating a lot of business opportunities for the supply chain. High demand also creates challenges, from aligning the supply chains to grid capacity and the need for qualified personnel to create future wind parks.

Floating Offshore Wind Tuesday 29 November | 11:30 – 12:30

Floating offshore wind turbines make renewable energy accessible to other parts of the world. Is it the game changer the energy transition is waiting for? The focus of this session will be on the opportunities this innovation brings to the supply chain, and the new regions where floating wind can be a solution to create renewable energy.

The Executive Outlook Wednesday 30 November | 13:30 – 14:45

The world is changing fast. What does it entail to lead a company in these turbulent times, where it is not business as usual? Expect insight information from business leaders that represent the different markets that together form the offshore energy sector. Because market collaboration is key when it comes to solving today's problems.

Featured speakers:

Canan Acar, Assistant Professor of Thermal Engineering at the University of Twente.
Session: The Roadmap of Hydrogen

Arnoud Kuis, Managing Director Offshore Wind at Van Oord.
Session: Opportunities in Offshore Wind

Harry Brekelmans, plc's Projects & Technology Director at Shell.
Session: The Executive Outlook

Barend Jenje, Commercial Director Floating Wind at GustoMSC
Session: Floating Offshore Wind

Marine Energy Tuesday 29 November | 13:30 – 14:45

Waters around us can create a supply of unlimited energy. So, what is going on when it comes to marine energy? Expect an update of the latest developments and insights from the industry and the broad perspective and outlooks when it comes to marine energy. Companies and policy makers share their knowledge. This session is powered by DMEC.

Future Proof Wednesday 30 November | 15:30 – 16: 30

The future starts now. How do you make decisions in a fast-changing world? Because the challenges are there. How are we going to move to a net zero supply chain? How important is it for your company to become more sustainable? With the reality that we need fossil energy too, to make the transition to renewables. How necessary is energy independency in a world that is becoming more unstable?

OFFSHORE WIND & HYDROGEN MASTERCLASS

Elaborating on previous editions, the Government of the Netherlands hosts a program during OEEC 2022 where it hosts exclusive masterclass sessions on offshore wind and hydrogen. The program brings together international government officials and business partners, aiming to build new partnerships, enhance international relations and to share knowledge and latest (policy) developments.

For more information and participation, please contact RVO at icep-offshorewind@rvo.nl citing OEEC22.

Government of the Netherlands

THE STAGE

At the open stage on the exhibition floor, different aspects of the offshore energy sector are put into the spotlight. Visit the The Stage for market insights, interviews and perspectives from the next generation. Also, extended due to great success, our OEEC reporter will share interviews from the exhibition floor. All items will be instantly available for the participants for sharing.

Human Capital

Young professionals and students will share their knowledge and views on the current trends and developments in maritime, offshore and energy sector. The discussion will touch upon the importance of the employer's vision nowadays. How to keep your team motivated and inspired and how to deal with staff shortage?

Start Ups

Start Ups will pitch their visions and missions on The Stage on the exhibition floor (in collaboration with Start Up Zone participants).

Market Update

Get up to date with market insights to increase your business knowledge. Professionals from Offshore Energy's supporting and endorsing partners share their views on current state of affairs, outlooks for the upcoming years and share opportunities in several regions and markets in the maritime, offshore and energy sector.

Hydrogen

Hydrogen stakeholders will present the latest hydrogen developments (in collaboration with Hydrogen Area participants).

Reporter on the Floor

OEEC reporter, Coco Kossmann shows the stunning exhibition floor, talks to exhibitors and visitors and presents products, innovations and the atmosphere during the two days. The footage will be instantly available for exhibitors for sharing.

Talks & Interviews

Our host interviews exhibitors about their developments and latest innovations. Alliances and consortiums talk about their collaborations and benefits of working together.

Do you have a topic that should be featured on The Stage? Submit your suggestions via conference@offshore-energy.biz.

EXHIBITION FLOOR

Get in touch with **±450 exhibitors** from the offshore wind, oil and gas and marine energy sector at the exhibition floor. Make sure to check out the **Hydrogen Area** - this year's new feature - the **Start Up Zone**, and the country / regional pavilions.

Make sure to make use of the **matchmaking tool** which is available for all event visitors to connect up to the event to enable one-on-one meetings and round table sessions during OEEC 2022.
